DETAILED ACTION

REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

After a careful review of the decision on appeal by the Board of Patent Appeals and Interferences mailed 11/29/2005 that "The Examiner's reference to column 1 of Laurent as describing the properties resulting from the thickness of the coating film does not provide motivation for increasing the thickness of Laurent's bonding layer" (page 6), and also in view of the fact that the independent claim 1 clearly recites each discrete layer in sequence, the Examiner now agrees that the disclosed scope of prior art reference by Laurent, at best, shows a maximum thickness ratio of layer (30) to layer (B), which correspond to layers B and A, respectively, in claim 1 of instant invention, of $0.30/0.5 = 1/17$, which is less than the claimed range of $1/6 - 1/2$ of instant invention. In summary, Applicant's argument that the present invention is distinct due to its claimed thickness ratio between discrete film and foam layers is neither obvious nor suggested by Laurent, and it provides unexpected improvement in mechanical property is found convincing.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
